

## Research Farm Projects

### Research Project/Demonstration

P-fertility × placement study  
K-fertility × placement study  
Nitrogen rates/crop rotation study  
NH<sub>3</sub> reduced rates study on corn  
Triticale fall planting date study  
Twin-row corn study  
Bean leaf beetle control in edible soybeans  
Lime rates and sources  
Specialty soybean variety trial  
Winter wheat/winter triticale variety trials  
Oat variety trial  
Long-term tillage/crop rotation study  
Soybean fungicide study  
Corn population study  
Triticale/residual nitrogen study  
Corn breeding research trials  
Lime rates/manure study  
Long-term organic rotation studies  
Organic soybean variety trial  
Open-pollinated corn variety trial  
Continuous Roundup<sup>®</sup> herbicide usage study  
Organic tillage study  
Flax seed evaluation  
Seeds of Change/Gerber squash trials  
Organic grape study  
Leopold grape management study  
State of Iowa wine grape variety trial  
Home demonstration garden  
All-America selections garden  
Home demonstration orchard  
Bailey flowering shrub demonstration  
Small fruit demonstrations  
Swine group lactation study  
Soybean rust sentinel plots  
Corn planting depth study  
Pasture finishing of beef cattle  
Beef cattle feeding in hoop barns  
Bionutrients for soybeans  
Timing of phosphorous application study  
Natural pork farrowing demonstration  
Adzuki edible bean population study  
Hardy hibiscus trial  
Organic seed coat treatments for corn
