

2005 Project List

Windbreak demonstration	Corn seed coating by planting date study
Home garden fruit and vegetable demonstrations	Sentinel plots for soybean rust
Grape variety trials	Soybean variety trials
Blueberry soil amendment study	Carbon sequestration study
Nut tree demonstrations	Long-term nitrogen study
Home garden orchard demonstrations	Kalona soil tillage study
Nira soil tillage study	Corn breeder trials
Grain pea rotation study	Potassium study in corn
Oat variety trials	Potassium study in soybeans
Wheat variety trials	Valor study in soybeans
Triticale variety trials	Soybean fungicide trials
No-till soybean planting date by population study	SCN variety trials
Organic cropping system for flax	Bean leaf beetle/aphid management study
Phosphorus study in no-till corn	Soybean foliar fertilizer study
P-K fertility study	Vertical tillage study
Strip cropping study	Native grasses demonstration
No-till corn planting date by population study	SCN/pH study
Corn insecticide evaluations	Sustainable corn breeding trial
Low-linolenic soybean variety trial	Conventional-till soybean planting date by population study
Native plants establishment study	
Phosphorus and potassium placement within tillage systems
